VILDAN **UDDIN**

BUSINESS OPERATIONS & SYSTEMS

I run a Canadian corporation's operations from Dhaka. The books, the automation that closes them, and the websites two brands sell through.

PROFILE

Operations and systems for a Canadian corporation with two consumer brands, run remotely from Dhaka. I own the bookkeeping, and I built the **double-entry ledger and automation platform** the business runs on.

EXPERIENCE

Business Operations & Systems

MAR 2026 – PRESENT

Greenzilla Group Inc. · Greenzilla Lawn and Snow & IceTra · Hamilton, Ontario (Remote)

- Built and maintain the Google Apps Script platform that runs daily operations: **20 scheduled triggers** and **seven intake forms**, under version control with a deploy pipeline.
- Built a **double-entry general ledger** inside it. The trial balance reconciles to **$0.00** and history is never rewritten.
- Own the full bookkeeping cycle, including automated monitoring of the sales-tax registration threshold.
- Build and maintain both brand websites end to end. One is generated by a custom Python static site generator.
- Traced both sites' absence from Google to an **X-Robots-Tag response header**. Both went from zero pages indexed to indexed in Search Console.
- Direct packaging design for the IceTra retail bag. Draft service agreements, subcontractor documentation and equipment leases.

PERSONAL BUILDS

Custom MCP server

Gave an AI coding agent a capability it did not ship with. Node and CLI.

AI operations tooling

A multi-provider gateway with failover, and a written policy on which business data may leave first-party infrastructure.
